

BUILDING LASTING PARTNERSHIPS BY LEVERAGING INTEGRATED VIDEO SECURITY

Meaningful public-private partnerships can form an even stronger foundation of trust between law enforcement agencies and the community. When communities and police consistently and constructively work together it can help to reduce crime, drive lasting economic development efforts and maximize the safety of units responding to a call for service.

With BAYCOM's Avigilon Public-Private Partnership (PPP) Program businesses can integrate new or existing cameras into law enforcement systems by leveraging Avigilon Cloud Services. Once the business is opted into law enforcement's camera sharing program, **the connection of Avigilon Cloud Services and Avigilon Control Center provide the following benefits:**

- Allows business owners a real-time view of their business property
- Records activities on the property to protect from frivolous claims
- Allows law-enforcement a real-time view in the event of a public safety incident
- Allows law-enforcement easier access to recordings in the event of an investigation
- Secure remote connection to the video security system

CREATE:

A Camera Share Program

LEVERAGE:

Existing Technology

IMPLEMENT:

A Package that Works for Your Community

RESPOND:

Responsibility with the Community
