

WHY SAFETY REIMAGINED?

BAYCOM has reimagined how safety is delivered by developing the first and only solution that unifies voice, video, data and analytics in a single platform.

With one integrated technology ecosystem supported by a single, trusted solution provider, your organization can achieve the foundation of safety that everything else is built on while also reducing costs, stress and risk.

Safety Reimagined is a unified solution that enables individuals, businesses and communities to work together in more powerful ways.

ECOSYSTEM COMPONENTS: VALUE PROPOSITIONS

ALLY SECURITY INCIDENT MANAGEMENT

Cloud-based incident management platform that streamlines security incident management, records management, communications and reporting.

AVIGILON ALTA AWARE

Simple, smart cloud-based video security systems that are cost-effective and allow you to scale quickly. Alta Aware video security systems are flexible and easily managed from any location.

AVIGILON ALTA CONTROL CENTER

Cloud-based access control system, that supports an open architecture for an unlimited number of users, entries and integrations for a flexible, future-proof solution.

AVIGILON UNITY ACCESS

Alarm and identity management provide superior control for accessing facilities. Avigilon Unity Access' integration with the Avigilon Unity Video video management software offers a robust, end-to-end security solution to monitor and secure sites.

AVIGILON UNITY VIDEO

Fixed video products with Artificial Intelligence (AI) and advanced analytics help you find and share critical intelligence faster.

AVIGILON COMMANDCENTRAL AWARE ENTERPRISE

Improve operational awareness, security and incident response with CommandCentral Aware Enterprise, a cloud-based solution that provides a consolidated view of real-time MOTOTRBO™ and WAVE-enabled broadband devices and incident locations, plus video cameras and feeds.

CONCEALED WEAPONS DETECTION (CWD)

The CWD system combines powerful sensor technology with proven Artificial Intelligence (AI), security ecosystem integrations and comprehensive venue analytics to ensure safer, more accurate threat detection at an unprecedented speed and volume.

CYBERSECURITY

Protects your organization by detecting and responding to cyber threats. Protects business and mission-critical communication systems, cloud applications, infrastructure, IT networks and endpoints.

MOTOTRBO RADIOS

BAYCOM's Digital Mobile Radio (DMR) communications system. MOTOTRBO can be used for voice and data, tracking fleets via GPS, ensuring production lines are always up by receiving alerts when PLCs fall out of calibration and work order tickets for maintenance teams.

ORCHESTRATE

A cloud-based virtual dispatcher that can streamline automated notifications to the right safety and security personnel to become more proactive versus reactive.

RAVE MOBILE SAFETY

RAVE is purpose-built to enable emergency and operational notifications, critical data sharing and response coordination.

VB400 BODY WORN CAMERAS (BWC)

The next generation of BWC technology that seamlessly fits around your existing workflows. All configuration and maintenance can be done ahead of time with our easy-to-use backend software, VideoManager. VB400 has full shift recording, pre / post-recording capabilities and multiple ways to connect.

ORCHESTRATE IN ACTION: FAST, ACCURATE DECISION MAKING

DETECT

Using Avigilon video security and analytics, an individual is detected suspiciously loitering in a stairwell. An alert is automatically sent to multiple radios and command centers based on predefined protocol.

ANALYZE

Video in and near the stairwell is populated and captures the offender and their appearance; they are tracked over multiple zones and cameras.

COMMUNICATE

The intruder's image and location are sent directly to security team radios for fast identification using voice and multimedia.

RESPOND

With the intruder's image and location in hand, security quickly locates the individual and appropriate action is taken. An incident is logged with pre-populated fields and relevant data allowing for further training and analysis.
